

Victoria Park venues continuing to break ground and shape the future

During October 2026, construction on Brisbane Stadium and the National Aquatic Centre continues, delivering on the 2032 Games promise and community legacy.

Brisbane Stadium

Early Works

Work on the Herston side of Victoria Park throughout October will include:

- ongoing earthworks and construction of haulage roads requiring the use of excavators, bulldozers, and large dump trucks
- transporting and placing materials at temporary and permanent stockpile locations
- earthworks and stockpiling will include the handling of existing onsite contaminated materials in accordance with relevant legislation requirements and controls
- construction of a shared user path, adjacent to Gilchrist Avenue, for a future diversion (more information to be provided prior to opening)
- installation of semi-permanent site fencing
- demolition of redundant infrastructure and services
- large machinery and plant movements to and from site (including out-of-hours deliveries to accommodate traffic requirements)
- increased truck movements to and from site via Gilchrist Avenue
- ongoing geotechnical testing
- continuation of targeted vegetation clearing as required for work areas
- ongoing installation of environmental controls.

Draft Victoria Park Precinct Legacy Plan consultation now closed

Thank you to everyone who took the time to have their say on the Victoria Park Precinct Draft Legacy Plan.

Feedback received during the consultation will help inform the final legacy plan and guide the future of the Victoria Park Precinct.

Community feedback is an important consideration in helping shape the final legacy plan. Consultation insights will be considered alongside the needs and priorities of future park users, venue operators, relevant authorities, the broader community and the commitments and requirements for the 2032 Olympic and Paralympic Games.

The 2032 Olympic and Paralympic Games provide an opportunity to create an iconic Brisbane destination that people will enjoy, use and value long after the event. The final outcome for the Victoria Park Precinct will balance what is required to deliver a successful Games and the long-term legacy of the precinct – delivering open space, easier ways to get around and new places to gather, play and experience the city.

The Department of State Development, Infrastructure and Planning will consider community feedback and undertake further planning and assessment before confirming the next steps. The community will continue to be updated on the Victoria Park Precinct Legacy Plan.

Work Hours – Brisbane Stadium and National Aquatic Centre

Most activities are planned from Monday to Saturday 6.30am and 6.30pm.

All work is subject to approvals, construction conditions and weather. We thank you for your understanding while work is underway.

National Aquatic Centre

Initial Works

Work is continuing onsite for the National Aquatic Centre during October and will include:

- decommissioning redundant infrastructure and services within Centenary Pool and park
- site survey and in-ground service identification
- investigations and planning for utility relocation work
- minor footpath construction activities at the far end of Victoria Park near Bowen Bridge Road and Gregory Terrace. This work may occur at night. Refer to map below
- borehole drilling for geotechnical investigations may also occur outside the main site fenced area
- out of hours deliveries to accommodate traffic requirements.

A bigger stage for Lions fans to roar

The new Brisbane Stadium will bring more seats, bigger crowds and an even better match-day experience for AFL fans and players in Queensland.

Hear from Brisbane Lions stars Jaspa Fletcher and Ally Anderson about what the new Brisbane Stadium will mean for the future of AFL in Brisbane.
